

## **NSEA Statement on Amendment to SB4**

The Nevada State Education Association has been the voice of Nevada educators for over 100 years.

Just in the last week, over 1500 educators contacted the Governor and legislature about the danger of shielding school districts from COVID-related liability. Educators rallied in front of the legislature in red face coverings to make return to school buildings as safe as possible and testified against the provisions late into the evening.

***The collective voice of educators delivered this win!***

NSEA thanks the legislature for bringing an amendment to SB4 to give us a fighting chance to reopen schools that are safe for educators and students. We applaud those who have organized for stronger protections for hospitality workers.

NSEA remains concerned about COVID-related liability limits for other Nevada employers and appreciates our partners who advocate to protect all Nevada workers. We believe every worker deserves a safe and healthy workplace.
